

Medication Practice Guide

Easy Read

This practice guide goes with the Medication Policy.

It is for staff at AMPEY PTY LTD who assist clients with administering medication.

Many participants at AMPEY need to take medication. Some participants can do this independently, while others need assistance from their supporting staff.

AMPEY staff need to be trained to administer medication to participants.

What do staff need to know?

AMPEY staff can only give medication when it is documented on the correct form.

MEDICATION AUTHORITY FORM

AMPEY requires all information regarding medication that a person seeking support requires a AMPEY disability support worker to assist with or administer. This form should only be completed by the treating medical/health practitioner and needs to be updated every 12 months, or when changes to medication occur.

PLEASE PRINT

Person Responsible (if nominated): _____
 Participant name (person seeking support): _____
 Date of birth: _____
 Name of Doctor/medical/health practitioner: _____
 Phone number of medical practice: _____
 Address of medical practice: _____
 Date form completed: _____ Review date: _____

Issue Date: 27/06/2021
 Version: 03/06/2021
 Review Date: Annually
 Version: 2

This form is called a **Medication Authority Form**. It is also known as a **MAF**.

The form needs to say **ALL** the medication that a participant takes. It says how a participant must take their medication also.

Only these people can write on the MAF:

- A doctor
- A nurse practitioner
- A dentist

Participants may take medication in different ways. This can be:

Medication that needs to be taken at the same time each day. This is called **Regular Medication**.

Medication that is only taken when it is needed. This is called **PRN**.

A different MAF is needed for each type of medication. A participant who takes regular and PRN medication will need to have 2 MAFs.

Every time a client takes medication it must be written down on the right chart.

This chart is called an **Individual Medication Record Chart (IMRC)**.

Each client has their own chart.

A different chart is needed for **regular medication and PRN medication**.

A participant takes both types of medication will need to have **2 IMRCs**.

S8 and S4D medications have special legal controls.

Every time a participant takes **S8/S4D medication** it must be written down on a **Count Sheet** as well as the **IMRC**.

The **Count Sheet** is kept with the **S8/S4D medications**.

When in **Supported Independent Living (SIL)** two staff (when available) must check any new medication from the pharmacy or brought in by a participant.

These must be written down on a **Medication Check-In Form**.

Why must staff follow this guide?

Participants can get sick if they do not get the right medication.

Staff must follow the training and rules of AMPEY. They must always give medication in the right way to keep participants safe.

It is the right thing to do and also a legal requirement.

Who must follow this guide?

All AMPEY staff who help participants to take medication must follow this guide.

Staff must be trained to give medication.

They must also have an assessment to say they are able to administer medication.

What staff MUST do

There are things all staff must do when they give medication.

Ask the participant for consent. The participant needs to agree you can give them medication.

If the participant can't show you their consent, you must tell them you are going to give them their medication.

Take out the participants folder and medications, one at a time.

Check you know how to give the medication.

Look at the participant's **Mealtime Management Plan and Medication Administration Summary**.

Look at other plans the participant has, like **Complex Bowel Care Management Plan**, if extra medications are to be given.

Cold Seal

Get what you need, and take to the participant. You will need:

- Medication Folder
- Medication Blister/Webster Pack.
- Any medication from the fridge.
- Any topical creams
- Any equipment like gloves or Pil-Bob.
- Medicine cup or syringe (as stated on medication)

Check the medication you are giving with another staff member if available.

If you are the only staff member there, you need to check the medication twice for safety.

Follow safe hygiene when you give medication. This means:

- Wash your hands
- Wear gloves
- Use a Pil-Bob.

Check the **MAF** with the other staff member, or double check the MAF twice if you are the only staff member there.

Check the details on the

- **MAF**
- **Medication Packs**
- **Individual Medication Record Charts (IMRC)**

Check the medication details on the MAF

- How much
- How to give it (Oral, Sublingual, Rectal, Topical, Parenteral)
- When to give it

The MAF must have clear information that you can read and follow. If not, you must phone the participant's doctor.

Check the IMRC and Webster Pak to make sure medication has not already been given.

Check the medication using the "6 Rights of Medication". This means:

1. The Right Person.

The name and photo of the client must be the same on the MAF and the webster pak.

2. The Right Medication

The name of the medication must be the same on the MAF and on the webster pak or medication package.

3. The Right Dose

The dose of medication must be the same on the MAF and on the webster pak or medication packaging.

4. The Right Time.

Check the MAF to see when the medication should be given. Check the IMRC to see when the medication was last given.

5. The Right Route.

Check the MAF to see how the medication should be given.

6. The Right Documentation.

Make sure the MAF is current and clear and filled in the right way.

Check in a respectful way that the participant has swallowed the medication.

If you are unsure, ask the client to show you they have swallowed the medication. Only ask this if you are unsure

Medication Administration Record (IMRC) form. The form includes a header with 'Regular Medication administration record', 'Participant Name', and 'Month and Year'. Below this is a large grid with columns for days of the week (Sun to Sat) and rows for medication administration. A small orange circle with 'IMRC' is in the top right corner. At the bottom left, it says 'New Form 2022 (2022)', 'Number: 2022/001', 'Version: 001', and 'Date: 01/01/2022'. At the bottom right, it says 'New Form'.

Fill in the **IMRC** to show all the medication that has been taken.

Lock away all medications in the right place. If in centre/house there will be a designated location for medication.

If in the community medication needs to be in a locked folder.

Take off your gloves and throw them in the bin. Throw away all other rubbish as well.

Ensure you wash your hands and any equipment and surfaces you used.

WHAT STAFF MUST NOT DO.

Do not give medication to a participant if they have not been trained or assessed as able to give medication.

Do not change a MAF in any way.

Do not leave medication out. You must lock it away in a safe place.

Do not give medication that is out of date or is not the same as on the MAF.

Remain focused on the task and not distracted by anything else when giving medication.

Do not force a participant to take their medication if they don't want to. Tell your manager or phone your Team Leader for assistance/guidance.

Do not sign the medication chart before the medication has been given.

Do not sign the medication chart if:

- You did not check the medication.
- You did not watch it being given.

Do not leave any part of an entry on the medication chart empty. You must fill in all the spaces.

Before staff can give medication

Before staff can give medication to a participant they must:

Do all medication training as provided in the AMPEY onboarding session or as required during employment.

Be assessed by the Registered Nurse as competent for administering medication.

Read the AMPEY PTY LTD Medication Policy and Medication Practice Guide.

Participant who self-administer or manage their own medication.

Participants will manage and administer their own medication when able to.

AMPEY will request written advice from a participant's medical practitioner or guardian, notifying that a participant has appropriate training and skill to assume responsibility for the management of their own medication.

Participants will be provided with every opportunity to safely manage and administer their own medication.

The self-administration and management of medications by the participant is properly supervised, documented and recorded by AMPEY staff.

Disposing of medications

All medications are to be returned to the pharmacist when ceased or disposed of as per the Clinical Waste Management Policy and Procedure.

Medication needs to be sealed in an envelope when being disposed of.

No "prescription only" medication may be kept at AMPEY Pty Ltd stock.

No medication are to be used by or for another participant or kept or allowed to accumulate with other participant medications for "later stock".

Short Term Medication

Short term medication may be needed for a short period of time. This could be trial medication or antibiotics.

This medication should be treated the same as routine medication and must be labelled and webster-pak.

It can only be given for the duration as prescribed by a doctor.

When things go wrong with medication

An incident is something that goes wrong. A medication incident is:

A dose of medication have been missed.

A participant does not agree to take their medication.

Medication is not taken at the right time.

Note - it is ok if medication is taken up to 30 minutes before or after the time written on the MAF.

Medication is given to the wrong participant.

The wrong dose of medication is given to a participant.

The medication chart has not been signed the right way to show medication has been given.

The medication in the webster pak is not the same as what is on the MAF.

Medication is dropped on the floor.

Medication is out of date/expired.

A participant vomits not long after they take their medication.

When there is an incident with medication you must:

In an emergency call 000.

shutterstock.com · 1964389951

Tell your manager/team leader and fill in an Incident Report.

Your manager/team leader might ask you to contact the participant's GP, pharmacy or other health professionals advice.

AMPEY contact details are: 0411 919 805.

Contact Health Direct if you require more professional advise.

Call 1800 022 222

You can call the Poison Information Helpline for guidance:

Call 13 11 26.

AMPEY MEDICATION ASSESSMENT

Before you can administer medication independently you need to pass this competency assessment. You need to pass all theory questions. In addition, you will be assessed on two separate occasions on your practical administration of medication and will need to pass all competencies.

COMPETENCY	The correct practice of administration of medications
PRINCIPLE	To ensure that all medications are administered safely to the right participant, at the right time via the right route. Actions to take in the event of an incident
ASSESSMENT	<ul style="list-style-type: none"> • To assess that the Support Worker has a full understanding of the medication policy and procedure. • To complete the Theory Assessment • To assess the support worker can competently assist the participant with their regular medication. • To monitor and observe the support worker during the administration of medications. • To assess that the support worker has the knowledge and understanding of the processes required if an error occurs or a behavior is exhibited during the medication administration process.
